

KINVENT

PHYSIO

THE PHYSIOTHERAPIST'S SOLUTION FOR MEASURABLE PROGRESS

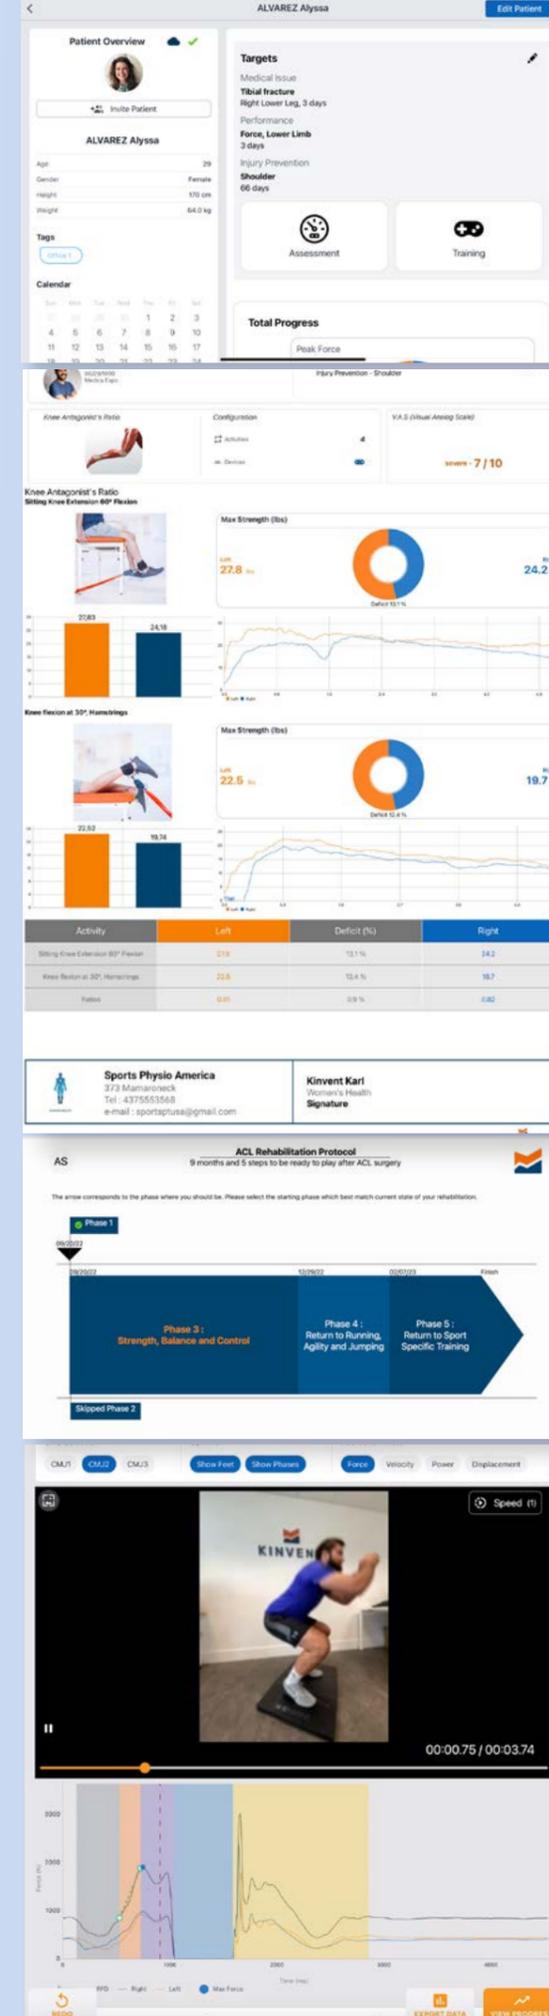

MEASURE. MOVE. PROGRESS.

PHYSIO-APP

THE APP THAT HIGHLIGHTS YOUR EXPERTISE EVERY DAY

Full patient file

Fill in the patient's pathology information to guide care and make their file available to all healthcare professionals in your office.

Personalized reports

Synthesize your rehabilitation results with the multiple export module.

Standard premium evaluations

Take a scientific approach to validated standard protocols: CMJ, Drop jump, Squat jump, McCall test, ASH test, squat analysis, Romberg, test profile strength, DSI, EVA, max strength, IMPT, antagonist ratio, posture analysis...

Rehabilitation assistant

Support your patient every step of the way in their recovery from the most impacting pathologies you treat, such as torn ACL.

K-apture

Film your patient's movement and synchronize it with every Kinvent Physio evaluations. Carry out qualitative analysis to integrate in your reports.

MyKinvent

Give your patient agency in their rehabilitation by giving them access to their own data.

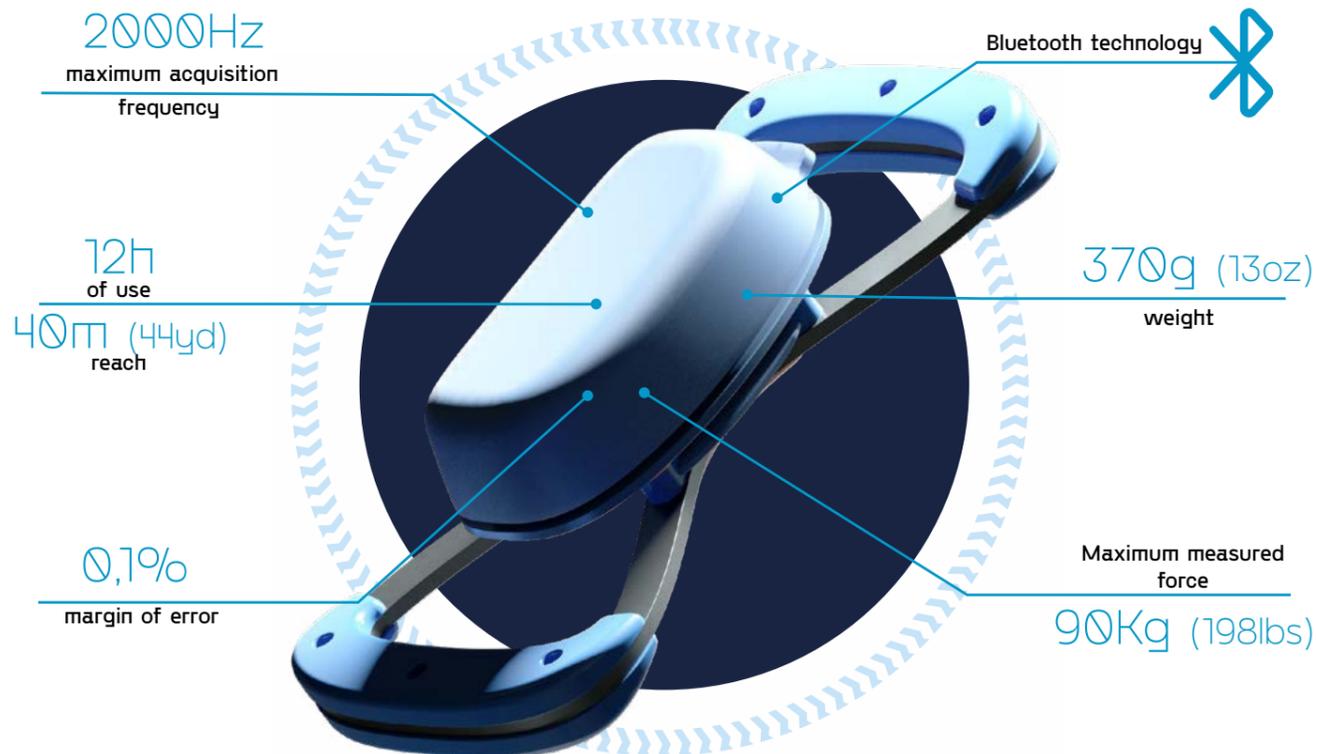

Kinvent Connect

Centralize all your data in one place and access it from any device: smartphone, tablet, computer, etc.

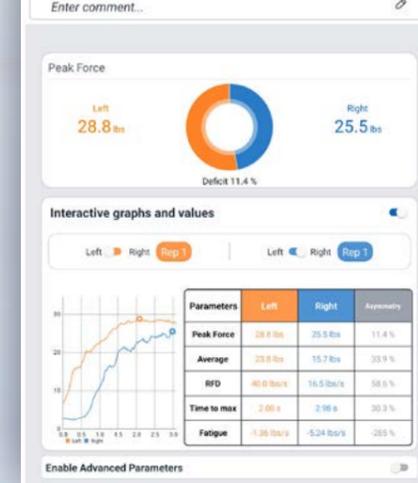

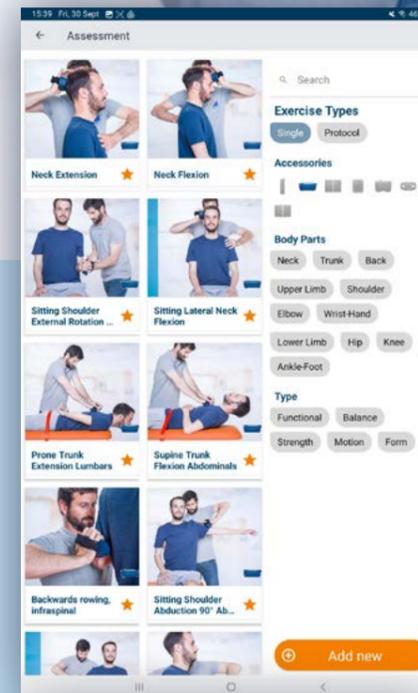

K-PUSH

A MANUAL DYNAMOMETER THAT FOLLOWS YOU EVERYWHERE

K-Push is ideal for field assessments or a quick evaluation. This precise and versatile manual dynamometer allows you to assess around forty muscle groups.

MEASURE. MOVE. PROGRESS.

TRACK YOUR PATIENTS' PROGRESS

Maximal force:

Measure the force peak and assess the maximal capacity of a muscle group in a specific situation.

Endurance:

Measure the average strength maintained for a given length of time to objectively assess the patient's capability to sustain a physical effort over time, as well as their fatigability.

Muscular symmetry:

Measure strength differences between opposite limbs or between agonist and antagonist muscles.

USE IT ON THE **PHYSIO-APP**

KINVENTPHYSIO

K-PULL

A PULL DYNAMOMETER YOU CAN SECURE ANYWHERE

K-Pull is the ideal tool to assess powerful muscular groups and record in real time your patient's results for specific tests.

2000Hz
maximum acquisition
frequency

Bluetooth technology

150g (5.29oz)
weight

12h
of use

40m (44yd)
reach

Maximum measured
force

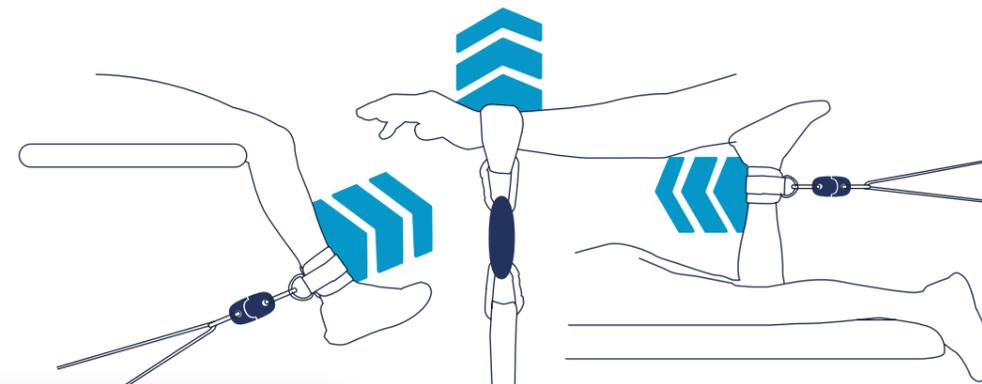

300Kg (661lbs)

0,1%

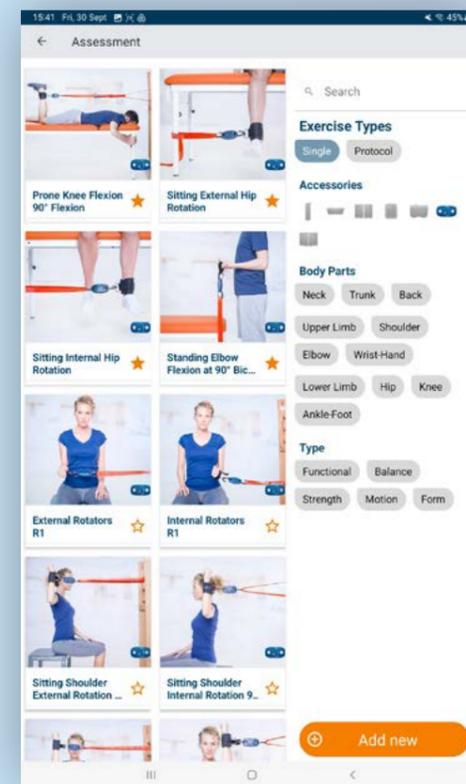

Margin of error
Outstanding reproducibility

DESIGNED TO BE EASILY SECURED TO A TABLE,
WALL BARS OR A PULLEY SYSTEM

TRACK YOUR PATIENTS' PROGRESS

Maximal force:

This test assesses the maximal capacity of a muscle group in a specific situation. The max corresponds to 100% of strength abilities. It is associated with a short and intense physical effort and gives a very useful working reference. The most relevant measured parameter is the force peak.

Endurance:

This test assesses the capacity to maintain a physical effort over time. It is associated with a long and sustained effort. The most relevant indicator to describe endurance is the average strength maintained for a given length of time. This evaluation can also highlight the patient's fatigability.

Muscular symmetry:

This test assesses the strength difference between two limbs. It is frequently used for serious lesions that require a long rehabilitation process and the use of tools to measure patient's progress over time.

USE IT ON THE **PHYSIO-APP**

K-GRIP

A CONNECTED DYNAMOMETER TO MEASURE GRIP STRENGTH

K-Grip was designed to assess and train grip strength. It is an essential tool to track grip strength and everything it entails. K-Grip is a must have for neurological rehabilitation, tracking fatigue in high-performance athletes, fighting the aging process, and so much more!

2000Hz maximum acquisition frequency

12h of use

40m (44yd) reach

0,2% margin of error

Bluetooth technology

170g (6oz) weight

Maximum measured force 90Kg (198lbs)

MEASURE. MOVE. PROGRESS.

USE IT ON THE **PHYSIO-APP**

Parameters	Left	Right	Asymmetry
Peak Force	70.8 lbs	75.5 lbs	6.2 %
Average	65.1 lbs	70.0 lbs	6.9 %
RFD	51.5 lbs/s	60.9 lbs/s	15.4 %
Time to max	3.69 s	5.11 s	29.4 %
Fatigue	-8.77 lbs/s	0 lbs/s	Infinity %

TRACK YOUR PATIENTS' PROGRESS

Maximal force: Measure the force peak and assess your patient's maximal grip strength in a specific situation.

K-Grip can also be used to extrapolate the lateral rotator strength. In some cases, grip strength could be an indicator of the recruitment capacity of the rotator cuff.

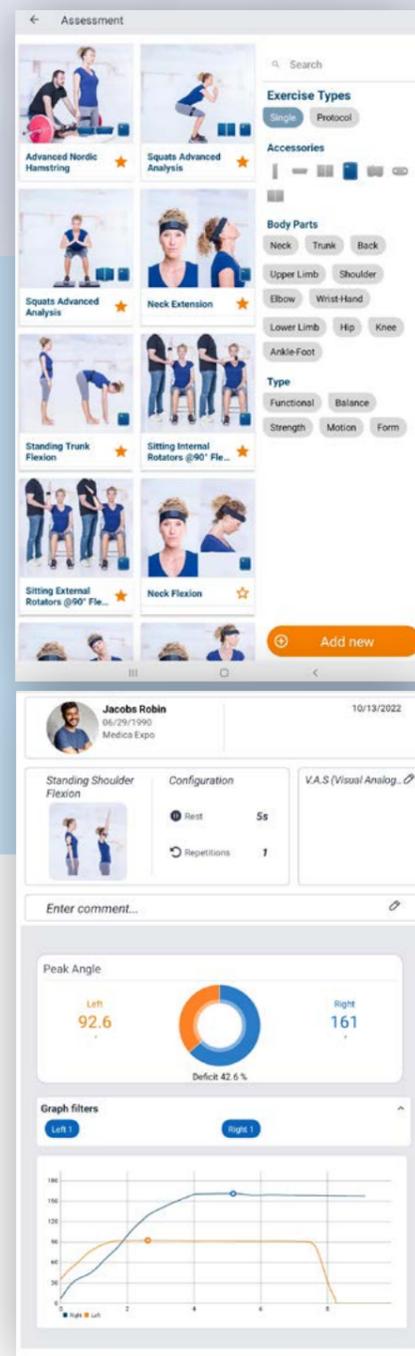

KINVENT **PHYSIO**

K-MOVE

A CONNECTED SENSOR TO ASSESS THE RANGE OF MOTION

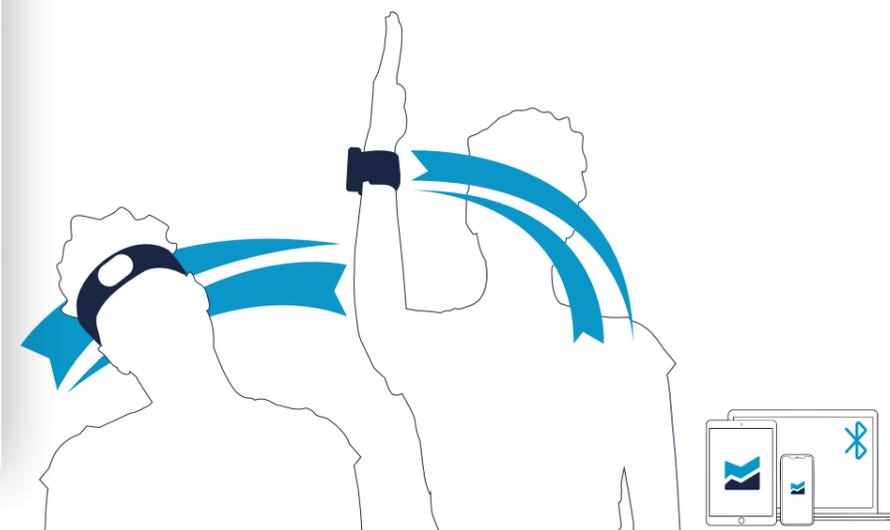

K-Move was designed to assess joint range of motion. With its built-in inertial sensor, it is a perfect tool for monitoring the rehabilitation of a joint's functional capacities.

TRACK YOUR PATIENTS' PROGRESS

Maximal range of motion: Measure a joint's peak range to objectively assess your patient's joint mobility during flexion, extension, abduction, adduction or rotation movements.

Use K-Move in conjunction with K-Push and K-Pull for an even more precise assessment. Depending on the protocol you follow, you will be able to refine results for tests such as unipodal balance or squat assessments.

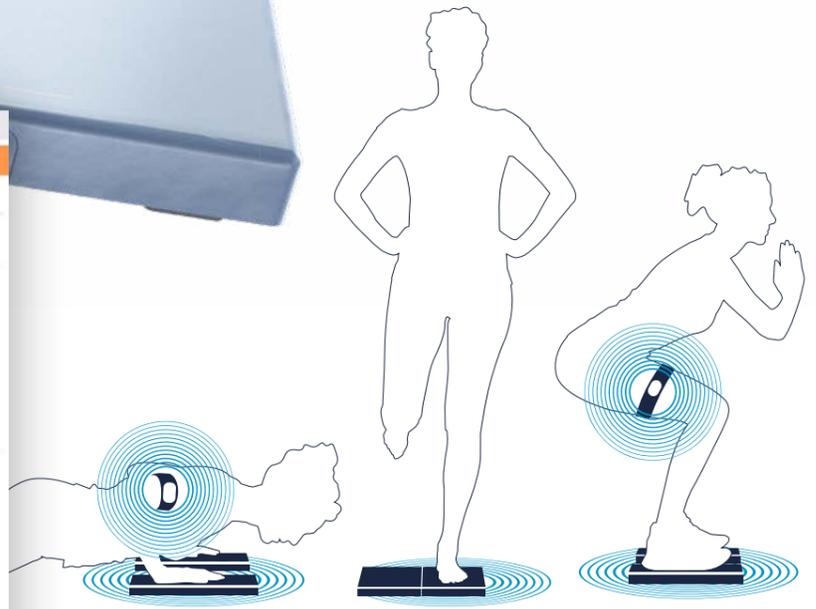

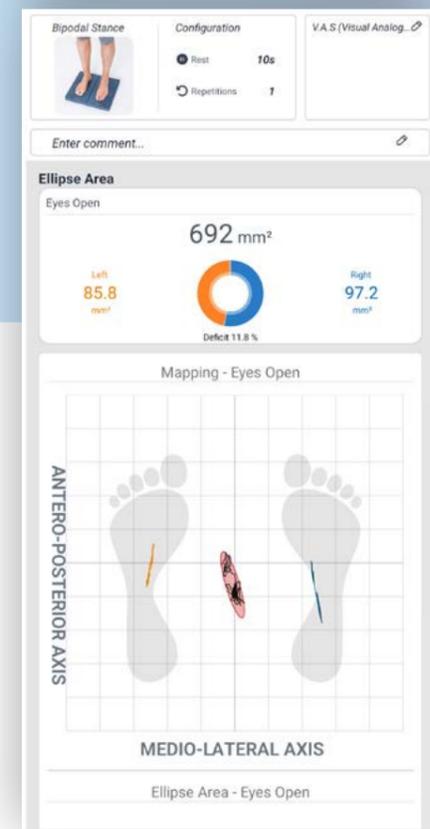

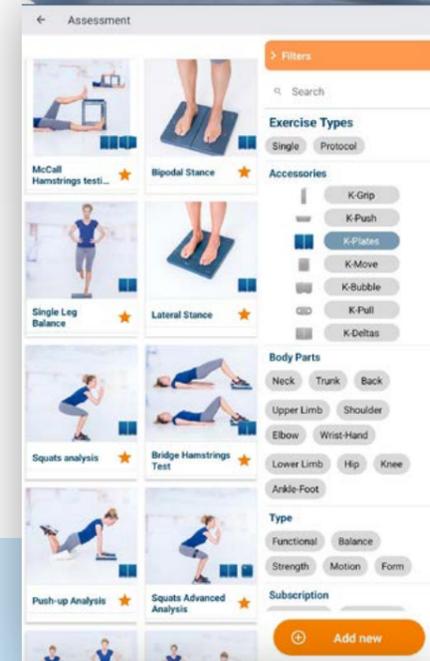

K-FORCE PLATES

FORCE PLATES FOR STATIC AND DYNAMIC BALANCE

The K-Force Plates were designed for posture analysis. They are also ideal for assessing and training proprioception in the lower and upper limbs.

- 1000Hz maximum acquisition frequency
- 20h of use
- 40m (44yd) reach
- 0,1% Margin of error
- 30X345X190_{mm} (1.18x13.62x7.52") thickness / length / width
- 2Kg (4.4lbs) Weight of each plate
- Bluetooth technology
- Maximum bearable strength 600Kg/Plate (1322lbs/Plate)

TRACK YOUR PATIENTS' PROGRESS

Using dynamic reports: Measure average distribution, instant maximal ground reaction force and weight distribution depending on the intensity of the applied forces.

Postural balance analysis: Measure the center of pressure and the weight distribution to objectively assess every detail of your patient's balance on lower or upper limbs.

K-DELTA

FORCE PLATES FOR ADVANCED BIOMECHANICAL ANALYSIS

K-Delta plates are designed for sports performance. They are the perfect tool to manage athletes' return to sport or to help them increase performance.

- 2000Hz maximum acquisition frequency
- 20h of use
- 20m (22yd) reach
- Maximum bearable strength: 2 Tonnes / Plate (4410lbs / Plate)
- Bluetooth technology
- 8,8Kg (19.4lbs) weight of each plate
- 44X547X368mm (1.73x21.53x14.48") thickness / length / width
- 0,1% margin of error

Assessment

Exercise Types: Single, Protocol

Accessories: K-Grip, K-Push, K-Plates, K-Move, K-Bubble, K-Pull, K-Deltas

Body Parts: Neck, Trunk, Back, Upper Limb, Shoulder, Elbow, Wrist-Hand, Lower Limb, Hip, Knee, Ankle-Foot

Type: Functional, Balance, Strength, Motion, Form

Jump Analysis - Counter Movement

Configuration: Rest 5s, Repetitions 3

V.A.S (Visual Analog Scale)

Enter comment...

Global Summary

Jump Height	Flight Time
0.784 ±14 ft	473 ±4 ms

Peak Force

4.54 ±4 lbs/kg	Deficit 3.1%
Left: 2.31 lbs/kg	Right: 2.24 lbs/kg

Peak Power

42.6 ±3 W/kg	Peak RFD
1352 ±26 lbs/s	
Left: 21.5 W/kg	Right: 21.1 W/kg
Left: 858 lbs/s	Right: 494 lbs/s
Deficit 1.8%	Deficit 42.5%

Graph filters

CMJ Selection: CMJ1, CMJ2, CMJ3

Options: Show Feet, Show Phases, Force, Velocity, Pow

Additional Filters

Graph showing Force (N) vs Time (s) with Legend: Unweighting, Braking, Propulsion, Flight, Landing

Enable Advanced Parameters

TRACK YOUR PATIENTS' PROGRESS ON JUMP ANALYSIS

Counter Movement Jump and Squat Jump (CMJ & SJ) protocol: Assess jump height and obtain indicators on the impulse phase: thrust, power, explosive force, RFD (Rate of Force Development) and left/right distribution.

Drop Jump (DJ) protocol: Record the jump height after landing, the force development during the contact with the ground, and the RSI (Reactive Strength Index).

TURNKEY PROTOCOLS

Force/Velocity spectrum profile: Measure the optimal load for maximum power.

Dynamic Strength Index (DSI): Measure the ratio of an athlete's ballistic peak strength to their isometric peak strength.

USE IT ON THE **PHYSIO**-APP

K-BUBBLE

AN INNOVATIVE PRESSURE DYNAMOMETER

K-Bubble is the ideal tool to objectively measure patients' ability to exert pressure with any body part, as it transforms pressure variations in force measurements.

175Hz
maximum acquisition
frequency

Bluetooth technology

36g (1.27oz)
weight

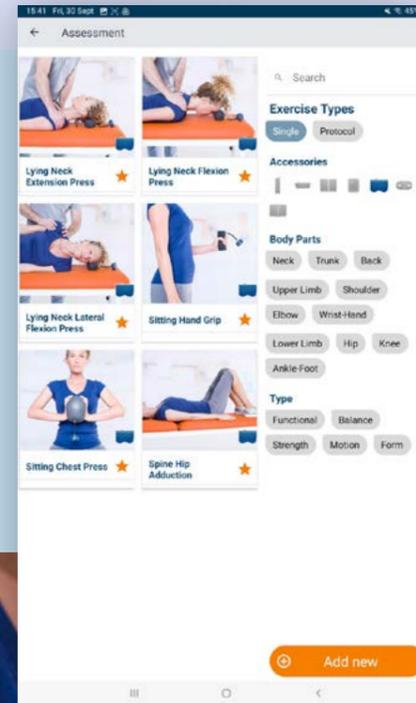

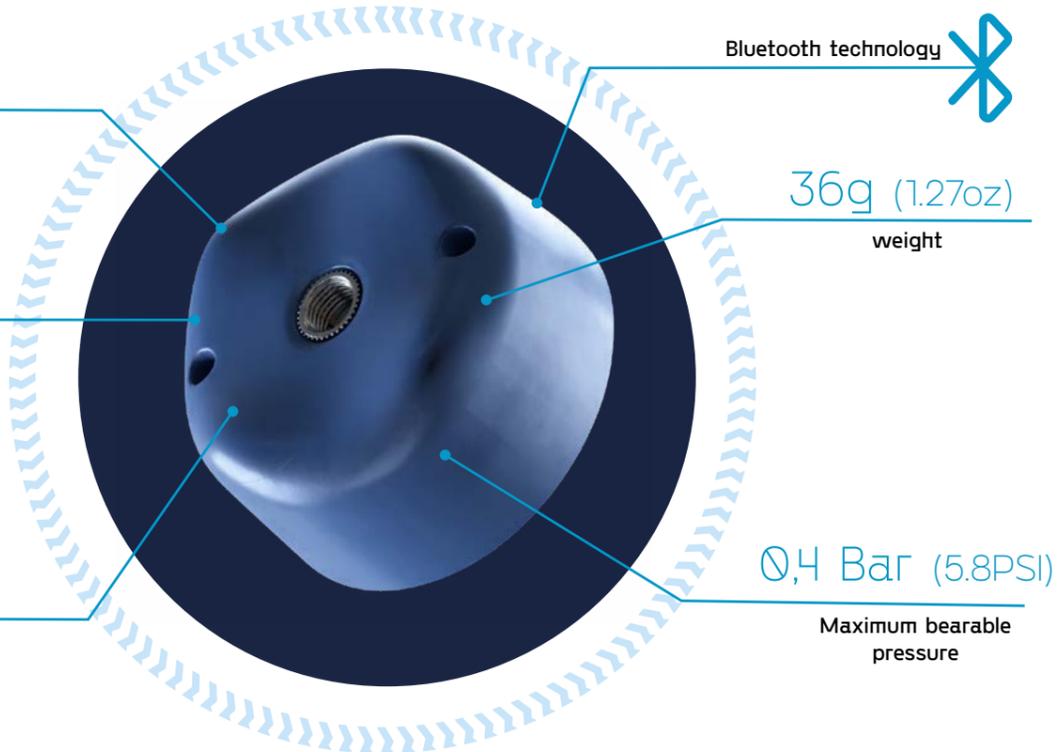

12h
of use

50m (54yd)
reach

1,5%
margin of error

0,4 Bar (5.8PSI)

Maximum bearable
pressure

TRAIN YOUR PATIENTS IN A FUN WAY

Biofeedback :
Create and adapt training programs through games targeting specific muscle groups, such as the adductors, the neck, and the grip muscles.

K-Bubble adapts to any type of inflatable cushion or ball with a valve. That way, you can vary the uses by simply changing the inflatable item you choose for the test.

ESSENTIAL PACK

An easy way to measure progress

K-Push | K-Force Plates | K-Move | Twin Handle

The Essential Pack is the smartest and easiest solution to move your practice from subjective to objective. This small toolkit includes the most versatile devices of the Kinvent product line to help you include data in your patient's rehabilitation journey.

This pack also includes a one-year subscription to the **STARTER LICENCE**

REHAB PACK

The best solution for patient engagement

K-Push | K-Force Plates | K-Grip | K-Move | K-Bubble | K-Pull | Twin Handle

The Rehab Pack includes everything you need to help increase patient motivation and insure long term patient engagement. The complete range of Kinvent devices is at your service in a single pack.

This pack also includes a one-year subscription to the **PREMIUM LICENCE**

MOVE & JUMP PACK

K-Deltas | K-Move

The Move and Jump pack combines force plates K-Deltas to K-Move, making biofeedback even more precise. This pack helps you build a force-velocity profile and then train your athlete accordingly.

This pack also includes a one-year subscription to the **PREMIUM LICENCE**

PRO STRENGTH & CONDITIONING PACK

K-Deltas | K-Push | K-Move | Nordic accessories x2

The Pro Strength and conditioning pack offers you all the tools to test your athletes. Not only it monitors progress day after day, these sensors will allow a separate use to an almost infinite number of strength ratio tests, maximum power, and even mobility.

This pack also includes a one-year subscription to the **EXCELLENCE LICENCE**

K-Push x2 | K-Force Plates | K-Grip | K-Move | K-Bubble | K-Pull | Twin Handle | Nordic accessories x2 | Jump Frame

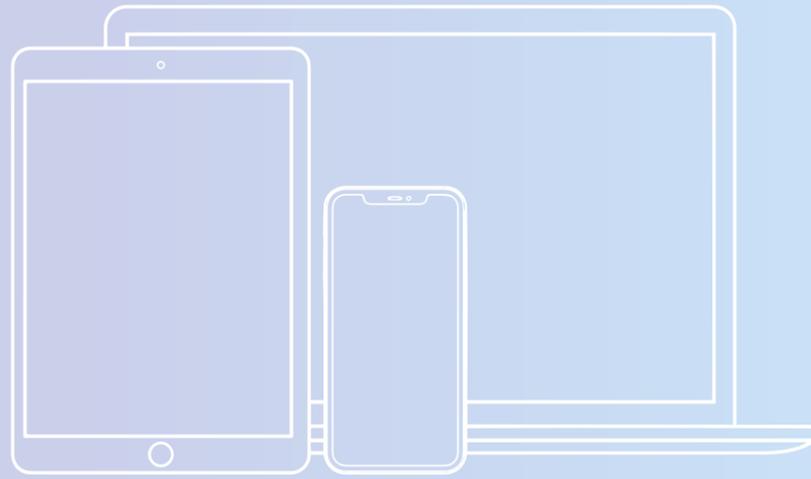

PHYSIO SPORT PACK

The ultimate solution to assess progress.

The Physio Sport Pack includes the entire range of Kinvent devices in a single pack to offer you a complete toolkit to efficiently measure and build progress.

This pack includes a one-year subscription to the **EXCELLENCE LICENCE**
